

Senior Product Manager, Singapore

As Senior Product Manager, you take ownership as 'CEO of your Products'. With your customer centric approach you drive your portfolio from idea to business success. You want to solve challenging problems, create great value for our customer and celebrate your success in our highly innovative company? Take this opportunity and join us to protect the built world with software, sensors and data.

What will you do

- As a Senior Product Manager, you are the central hub within our company for a lot of critical information about your products, market, competitors, customers, prospects, key industry analysts, and many other stakeholders
- To succeed, you will continuously interact with external as well as internal stakeholders and gather and analyze data and business intelligence
- You will translate and structure these inputs to continuously shape new value propositions and business models
- You will actively test and validate your proposals in the market and with this shape your portfolio vision and the roadmap strategy to get there
- You define and prioritize the development backlog to maximize customer value output, translate business needs to R&D requirements and drive the implementation from idea to accomplished field tests
- You spear head the go-to-market based on your marketing strategy and support our sales force with world class sales and marketing tools and product support
- You evangelize the product in appropriate channels and drive its adoption by customers
- You actively listen to our customers and evaluate the market feedback for product improvement and new product ideas
- For all of this, you will travel where and when it is required

What do we expect

Basic Qualifications

- University degree in engineering or computer science, ideally complemented with business education
- At least 10+ years of experience in product management and/or development; esp. subscription-based B2B software/app or any IoT related business
