

Computer Vision / ML Engineer (Singapore)

As a Computer Vision / ML engineer, you will be a critical team member and fully responsible for developing backend components for our products. In this role, you will work closely with product managers, UI-UX designers and iOS engineers, therefore a commitment to collaborative problem solving is important.

What will you do

- Design, build and maintain efficient and reliable software modules for Screening Eagle software products
- Develop computer vision and machine learning tools and applications
- Analyse different computer vision and machine learning algorithms and results
- Assist other team members to implement AI-powered visual computing applications
- Collaborate with team members to integrate the components to mobile and web platforms end products

Preferred Qualifications

- Experience in computer vision and video analytics algorithms and libraries
- Experience in machine learning algorithms for vision problems
- Experience in robotics algorithms for SLAM, path planning and motion
- Understanding of the 2D/3D graphics
- Experience with macOS / iOS and Linux platform

What do we expect

Basic Qualifications

- MA/MS/PhD degree in Computer Science, Machine Learning, or strong experience in CV/ML/Robotics
- Proficiency in C++11 and above, or comparable languages
- Proficiency in Python 3
- Good understanding of software design patterns
- Good knowledge of data structures and algorithms for OOP
- Good understanding of memory management in non-garbage collected environments
- Familiar with memory and CPU usage optimisation
- Solid linear algebra knowledge for CV/ML problems

About the #EagleTeam

Screening Eagle Technologies | Proceq | Dreamlab

We are on a mission to protect the built world with software, sensors and data. We hire talented problem-solvers with bold ambition who share our passion for inspection technology to sustain mission-critical assets and infrastructure for future generations. Our culture is creative, innovative and inclusive. We are a fast-paced, product-driven, growth company headquartered in Switzerland with our Singapore technology hub and a global mindset looking to lead a digital revolution in inspection.
