

XR1000

The world's first public smart scanner. See hidden objects before you drill, core, or cut with confidence.

Depth

See up to 40cm deep - where basic detectors stop guessing, XR1000 keeps seeing. Concrete, drywall and masonry: walls, ceilings and slabs, including the backwall.

Smart imaging

No beeps. No raw signal to decode. Just a clear image, powered by EM-wave technology & Eagle XR intelligence - water pipes, electrical cables, tendons, conduits, and rebar, shown exactly where they are.

Pocket-sized

No bulky box, no wheels, no annoying embedded screen. A compact, handy sensor that runs its display right on the phone already in your pocket.

Eagle XR app
Tech Specs

Measurement mode	Line scan
Review modes	Comprehensive colorful imaging
Smart settings	Sensitivity: adjust signal up or down for a clearer picture Material selection: concrete (dry, normal, or wet), drywall, brick/block Boundary detection: see the far side of the wall or slab Carpet mode: scan through carpet
Compatible devices	Smartphone: iOS, Android & HarmonyOS
Connectivity	Wi-Fi: live to phone
