

## Proceq Ground Penetrating Radars

# GP8100

---

Highly productive portable concrete GPR array, enabling quick object detection and superior data collection

---

### Productivity

Boost scanning efficiency with 25cm effective scan width and 80cm penetration depth, one scan is equivalent to 6 classical line scans

### Visualization

Detecting objects of all sizes and marking on concrete surfaces has never been so easy and fast with the superline scan view

### Density

The high scan rate of 1'200 scans/s enables a very dense GPR data collection in only one superline scan, which can be visualized in 6 classical line scans
