

Manual Film Applicators **ZAF 2010**

4-sided Applicator Frame

Versatility

The applicator frame can be used manually or in combination with automatic film applicators. Various width and thickness combinations (4 per version) are available.

Reliability

A significant advantage that the coating material being applied is retained within the guide walls, resulting in clean and precise applications.

Ease of Use

The film thickness can be easily chosen by placing the applicator with the desired thickness.

Processing Unit / Sensor

Measurement Modes	4 gap heights depending on version: 30 / 60 / 90 / 120 μm (1.18 / 2.36 / 3.54 / 4.72 mil) 50 / 100 / 150 / 200 μm (1.97 / 3.94 / 5.91 / 7.87 mil) or 4 on request from 5 - 2,000 μm (0.20 - 78.74 mil)
Measuring Geometries	Film Width depending on version: 60 mm (2.36") 80 mm (3.15") or on request from 20 mm to 200 mm (0.79" - 7.87")

SWISS  MADE

Present in +100 countries, we serve inspectors and engineers all over the world with the most comprehensive range of InspectionTech solutions, combining intuitive software and Swiss-manufactured sensors.
