

Permeability **Torrent**

Concrete air permeability tester for the on-site assessment of concrete quality

Efficiency

A two-chamber vacuum cell and a pressure regulator, which ensure an airflow at right angles to the surface for rapid concrete air test.

Ease of use

The unit has a user-friendly menu technique and measures the pressure increase as a function of time according to a specific sequence

Simplicity

Calculation of the permeability coefficient kT is based on a simple theoretical model for rapid, accurate on-site non-destructive testing

Instrument

Tech Specs

Measured Quantity	Permeability coefficient kT [10-16m2]
Instrument Firmware	Data transfer capabilities to third party software
Display	128 x 128 graphic LCD
Memory	200 measured values
Connections	RS 232 or optional adapter to USB
Measuring Range	-10 °C to +60 °C

Standards & Guidelines	Description
SIA 262-1	

Present in +100 countries, we serve inspectors and engineers all over the world with the most comprehensive range of InspectionTech solutions, combining intuitive software and Swiss-manufactured sensors.
