Developing the Best Strategies for Longer-lasting Concrete Structures

Here at Screening Eagle, we love to hear how our technologies are being used to increase quality, safety and longevity of the built world.

Meet Marton Marosszeky for example, Director at BCRC Australia and one of Screening Eagle's valued customers who shared their story with us at #KEY22SET Built World Keynote & Product Launch Event.

If anyone knows about concrete durability, it's Marton Marosszeky from Australia.

As a specialist consultant, civil engineer, widely published professor, and co-author of two books, Marton's experience spans several decades.

His main mission is to ensure longevity of buildings and infrastructure with optimum quality and safety.

To achieve this, Marton and his team work with advanced inspection software to manage large and complex projects.

Armed with data, reports, and communications in one place, Marton is able to develop the most reliable strategies for longer lasting concrete structures.

See more customer stories, detailed case studies and more about INSPECT software over on our Tech Hub.
